PYRONIX AND INTAMAC FORGE PARTNERSHIP

Pyronix, one of the world's leading security manufacturers, and Intamac Systems Ltd, the UK's leading expert in Internet Accessed Monitoring and Control services, have agreed a working partnership to develop new products and capabilities for the intruder alarm industry.

Pyronix, recognising the need to add further value to their product range, are working with Intamac to deliver more intelligent information from their alarm panels that will be of benefit to both installers and their customers. The partnership will re-emphasise Pyronix's reputation for high quality, high value products, by delivering off-the-shelf bundled solutions that will appeal to both Pyronix's established installer base, and new installers alike.

"Intamac's services are just what we are looking for to expand our portfolio of products. We intend to deliver to installers advanced panels that are simple to programme and fit, and provide new benefits to their customers. Working with Intamac will allow us to bring new product features and capabilities to market, which offer real advantages to customers. We are focussed on affirming our market position as the UK's leading supplier of innovative security products," says Sebastian Herrera, Commercial Director for Pyronix.

Dave Rimmer, Business Development Manager for Intamac, mirrors the sentiment, "By using the advanced hardware technology that already exists in Pyronix's communicating alarm panels, we will be able to quickly deliver new capabilities to enhance their range of quality panels. We are pleased to be working closely with Pyronix on the development of new product concepts, and hope to help drive the sales of monitored alarm systems to within the reach of every installer."

*** Ends ***

*Intamac Systems Ltd is the UK's market leader in the field of Internet enabled security monitoring systems. The Internet is the fastest growing technology in history and is creating new opportunities to offer customers exciting new services. Intamac have embraced this technology to develop an Internet platform that can provide new ways of monitoring alarms and alerting customers: The **Intamac Home Manager™** is the world's first Internet based property monitoring service. Designed to support the average home, customers can buy a level of service to suit their needs, and this can be managed by using their website or by calling a contact centre.*

Intamac Systems Limited is continuously working to develop the communications infrastructure and services that will enable systems and appliances to be networked using the Internet. As the home and business environment become more and more automated, Intamac will be able to provide their customers with the ability to monitor and control these systems remotely from a website, a mobile phone, or any other compatible device.

Intamac are a 9001:2002 compliant company and won a UK Security Excellence Award in 2003.
